

MOBILE DELIVERY FOR EASYVISTA

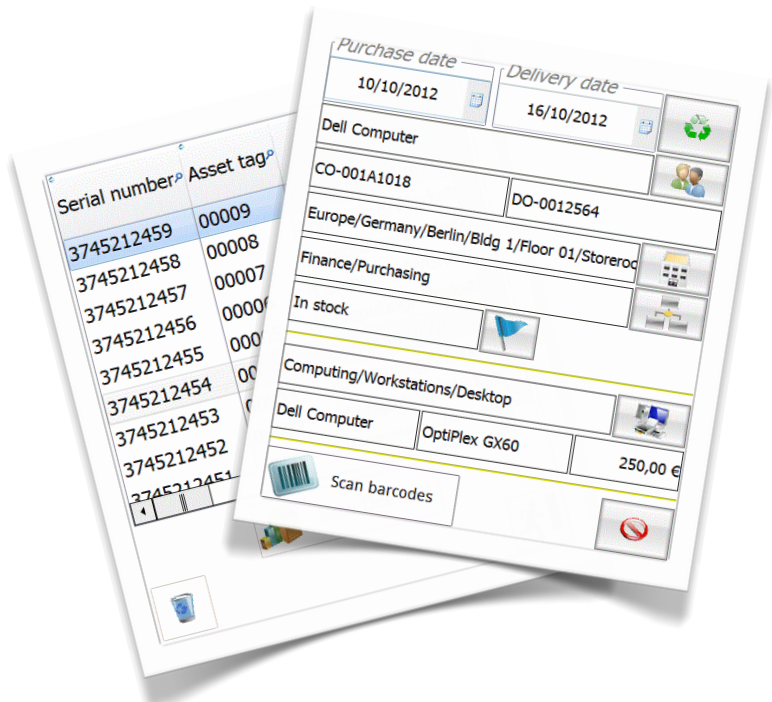

Mobile **Delivery for Easyvista** allows **reception of your products deliveries** by bar-code reading via a pocket-pc. With that mobile technology, the staff in charge, easily and quickly, updates stocks in Easyvista.

2 - Take a delivery

The person in charge registers delivery-note's informations and finally scans all serial numbers.

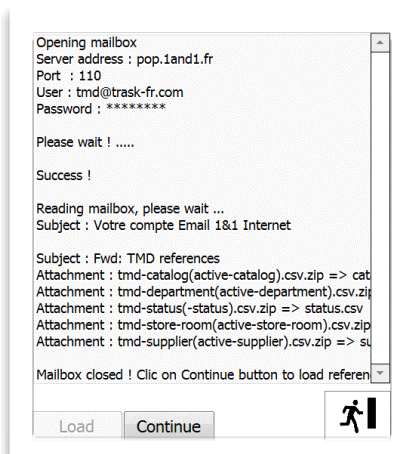

The association with an asset tag can be done at the same time.

In three steps, Mobile Delivery will provide you a real situation in store rooms.

1 - Import references

Mobile Inventory reads mails, containing asset management's references, sent by Easyvista with scheduled reporting function.

3 - Send results

Mobile Delivery returns results to Easyvista with mail or ftp mode.
