

MOBILE INVENTORY FOR EASYVISTA

Installed on a bar code reader, **Mobile Inventory for Easyvista** gives you a simple way to manage your **computing or general asset inventory**.

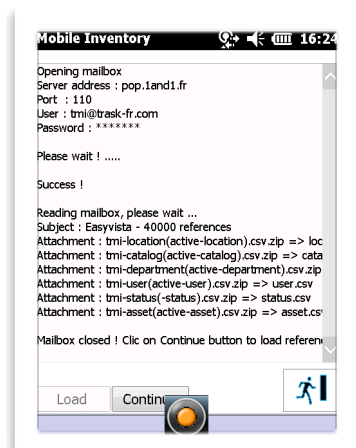

In three steps, Mobile Inventory will provide you a real situation of your equipment.

1 - Import references

Mobile Inventory reads mails sent by Easyvista with scheduled reporting.

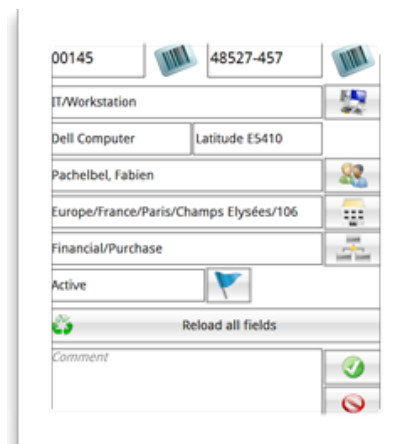

These mails contain asset management references.

2 - Take an inventory

The staff in charge of the inventory check through each department and desk.

It scans each equipment and controls category, user, department, location and status.

3 - Send results

Mobile inventory returns inventory's results to Easyvista with mail or ftp mode.
